

We need four feature branches to bind up our project.

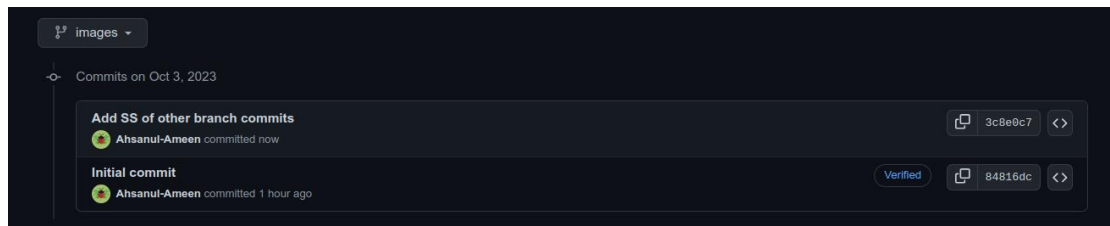

1. assets
2. html
3. text
4. images (containing only SS)

And our source of truth branch is main with initial README.md file

Please find below commit history for individual branches:

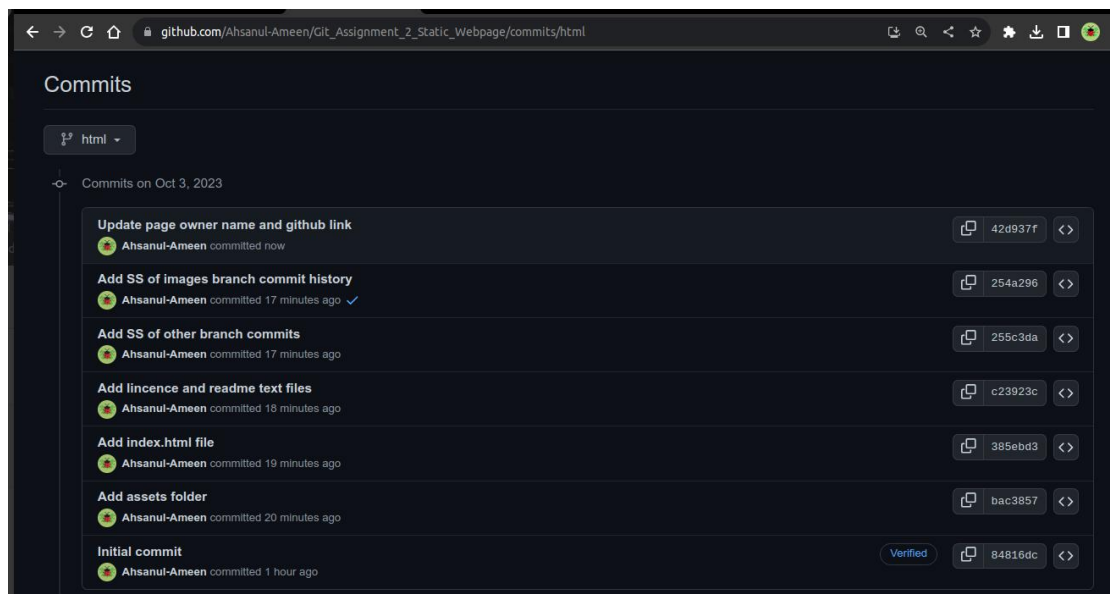

The screenshot displays a Git commit history interface with a sidebar on the left and a main content area. The sidebar has a search bar and a list of branches: main (default), assets, html, and text (selected). The main content area shows the commit history for the selected branch, with a 'Switch branches/tags' button at the top. The commit history is organized by date, with a section for 'Commits on Oct 3, 2023'. Each commit entry includes a description, the author's name, the time since the commit, a 'Verified' badge, a commit hash, and a 'Compare' button. The commits are as follows:

- text branch:**
 - Add licence and readme text files** by Ahsanul-Ameen, committed 3 minutes ago. Hash: 73b59ef.
 - Initial commit** by Ahsanul-Ameen, committed 1 hour ago. Hash: 84816dc.
- html branch:**
 - Add index.html file** by Ahsanul-Ameen, committed 8 minutes ago. Hash: 89ab3b8.
 - Initial commit** by Ahsanul-Ameen, committed 1 hour ago. Hash: 84816dc.
- assets branch:**
 - Add assets folder** by Ahsanul-Ameen, committed 12 minutes ago. Hash: c3bde7b.
 - Initial commit** by Ahsanul-Ameen, committed 1 hour ago. Hash: 84816dc.
- main branch:**
 - Initial commit** by Ahsanul-Ameen, committed 1 hour ago. Hash: 84816dc.

After that we've created four pull request and merged to main utilizing rebase to ensure liner commit history.

Lastly we rebased html branch from main (locally) and updated the content of index.html file. Hence another PR was needed.
